Denpasar, Bali
Github   LinkedIn

I'm a passionate full-stack developer with a solid foundation in Information Systems, currently specializing in PHP and Laravel. While I'm proficient in both front-end and back-end development, my true strength lies in crafting robust and scalable back-end systems. I've built and contributed to various Laravel-based projects, some of which you can view here: https://adiwarsa.siverlent.id. I thrive in dynamic, collaborative environments and continuously seek opportunities to grow by learning new technologies and best practices.

Work Experience

CV. Balinet Intermedia   (Mar 2022 - Jun 2022)

Web Developer

- Making system flow designs using draw.io
- Design prototypes and create user interface design using Figma
- Develop and maintain website using Laravel and Codeigniter
